MAIN FEATURES

scat is not only music-relative

MAIN FEATURES

arity

type

coupling

(wip) allocator

```
scat > launch arity pgm/bin/mupdf-x11 poc.pdf
```

```
[*] Launching arity inference on pgm/bin/mupdf-x11
```

```
[*] /usr/bin/pin/pin -ifeellucky -t ./bin/obj-intel64/arity.so -o
```

```
./log/mupdf-x11_arity_1487084838.log -logfile ./log/mupdf
```

```
x11_arity_1487084838.dbg -- pgm/bin/mupdf-x11 poc.pdf
```

```
[*] Inference results logged in ./log/mupdf-
```

```
x11_arity_1487084838.log
```

```
[*] Execution time: 18.441624s
```

```
scat > display mupdf-x11 arity
```

```
mupdf-x11:4216716:wincursor: 2 -> 0
```

```
mupdf-x11:4221641:onmouse: 5 -> 0
```

```
mupdf-x11:4225337:fz_mini: 2 -> 1
```

```
...
```

```
Inference
```

```
| Date: 2017-02-14 16:07:18
```

```
| Total functions inferred: 1128
```

```
- Program functions inferred: 775
```

MAIN FEATURES

arity

type

coupling

(wip) allocator

Undertyping

MAIN FEATURES

arity

type

coupling

(wip) allocator

```
scat > launch type pgm/bin/mupdf-x11 poc.pdf
[*] Launching type inference on pgm/bin/mupdf-x11
[*] /usr/bin/pin/pin -ifeellucky -t ./bin/obj-intel64/type.so -o
./log/mupdf-x11_type_1487085653.log -logfile
./log/mupdf-x11_type_1487085653.dbg -i
./log/mupdf-x11_arity_1487084838.log -- pgm/bin/mupdf-x11 poc.pdf
[*] Inference results logged in ./log/mupdf-
x11_type_1487085653.log
[*] Execution time: 16.957328s
```

```
scat > display mupdf-x11 type
void onmouse(int, int, int, int, undef);
int fz_mini(int, int);
addr next_pool_image(void);
```

...

Inference

```
| Date: 2017-02-14 16:20:53
| Total functions inferred: 1127

Overview

Pin is a dynamic binary instrumentation framework for the IA-32, x86-64 and MIC instruction-set

PHILOSOPHY

open-source

dynamic analysis

scalable

modulable

one single execution

(stripped) binaries

Execution of mupdf: 15s

(on a 10-page PDF document)

PHILOSOPHY

open-source

dynamic analysis

scalable

modulable

one single execution

(stripped) binaries

<https://github.com/Frky/scat#add-your-own-pintool>

PHILOSOPHY

open-source

dynamic analysis

scalable

modulable

one single execution

(stripped) binaries

~~while True:
 execute()~~

PHILOSOPHY

open-source

dynamic analysis

scalable

modulable

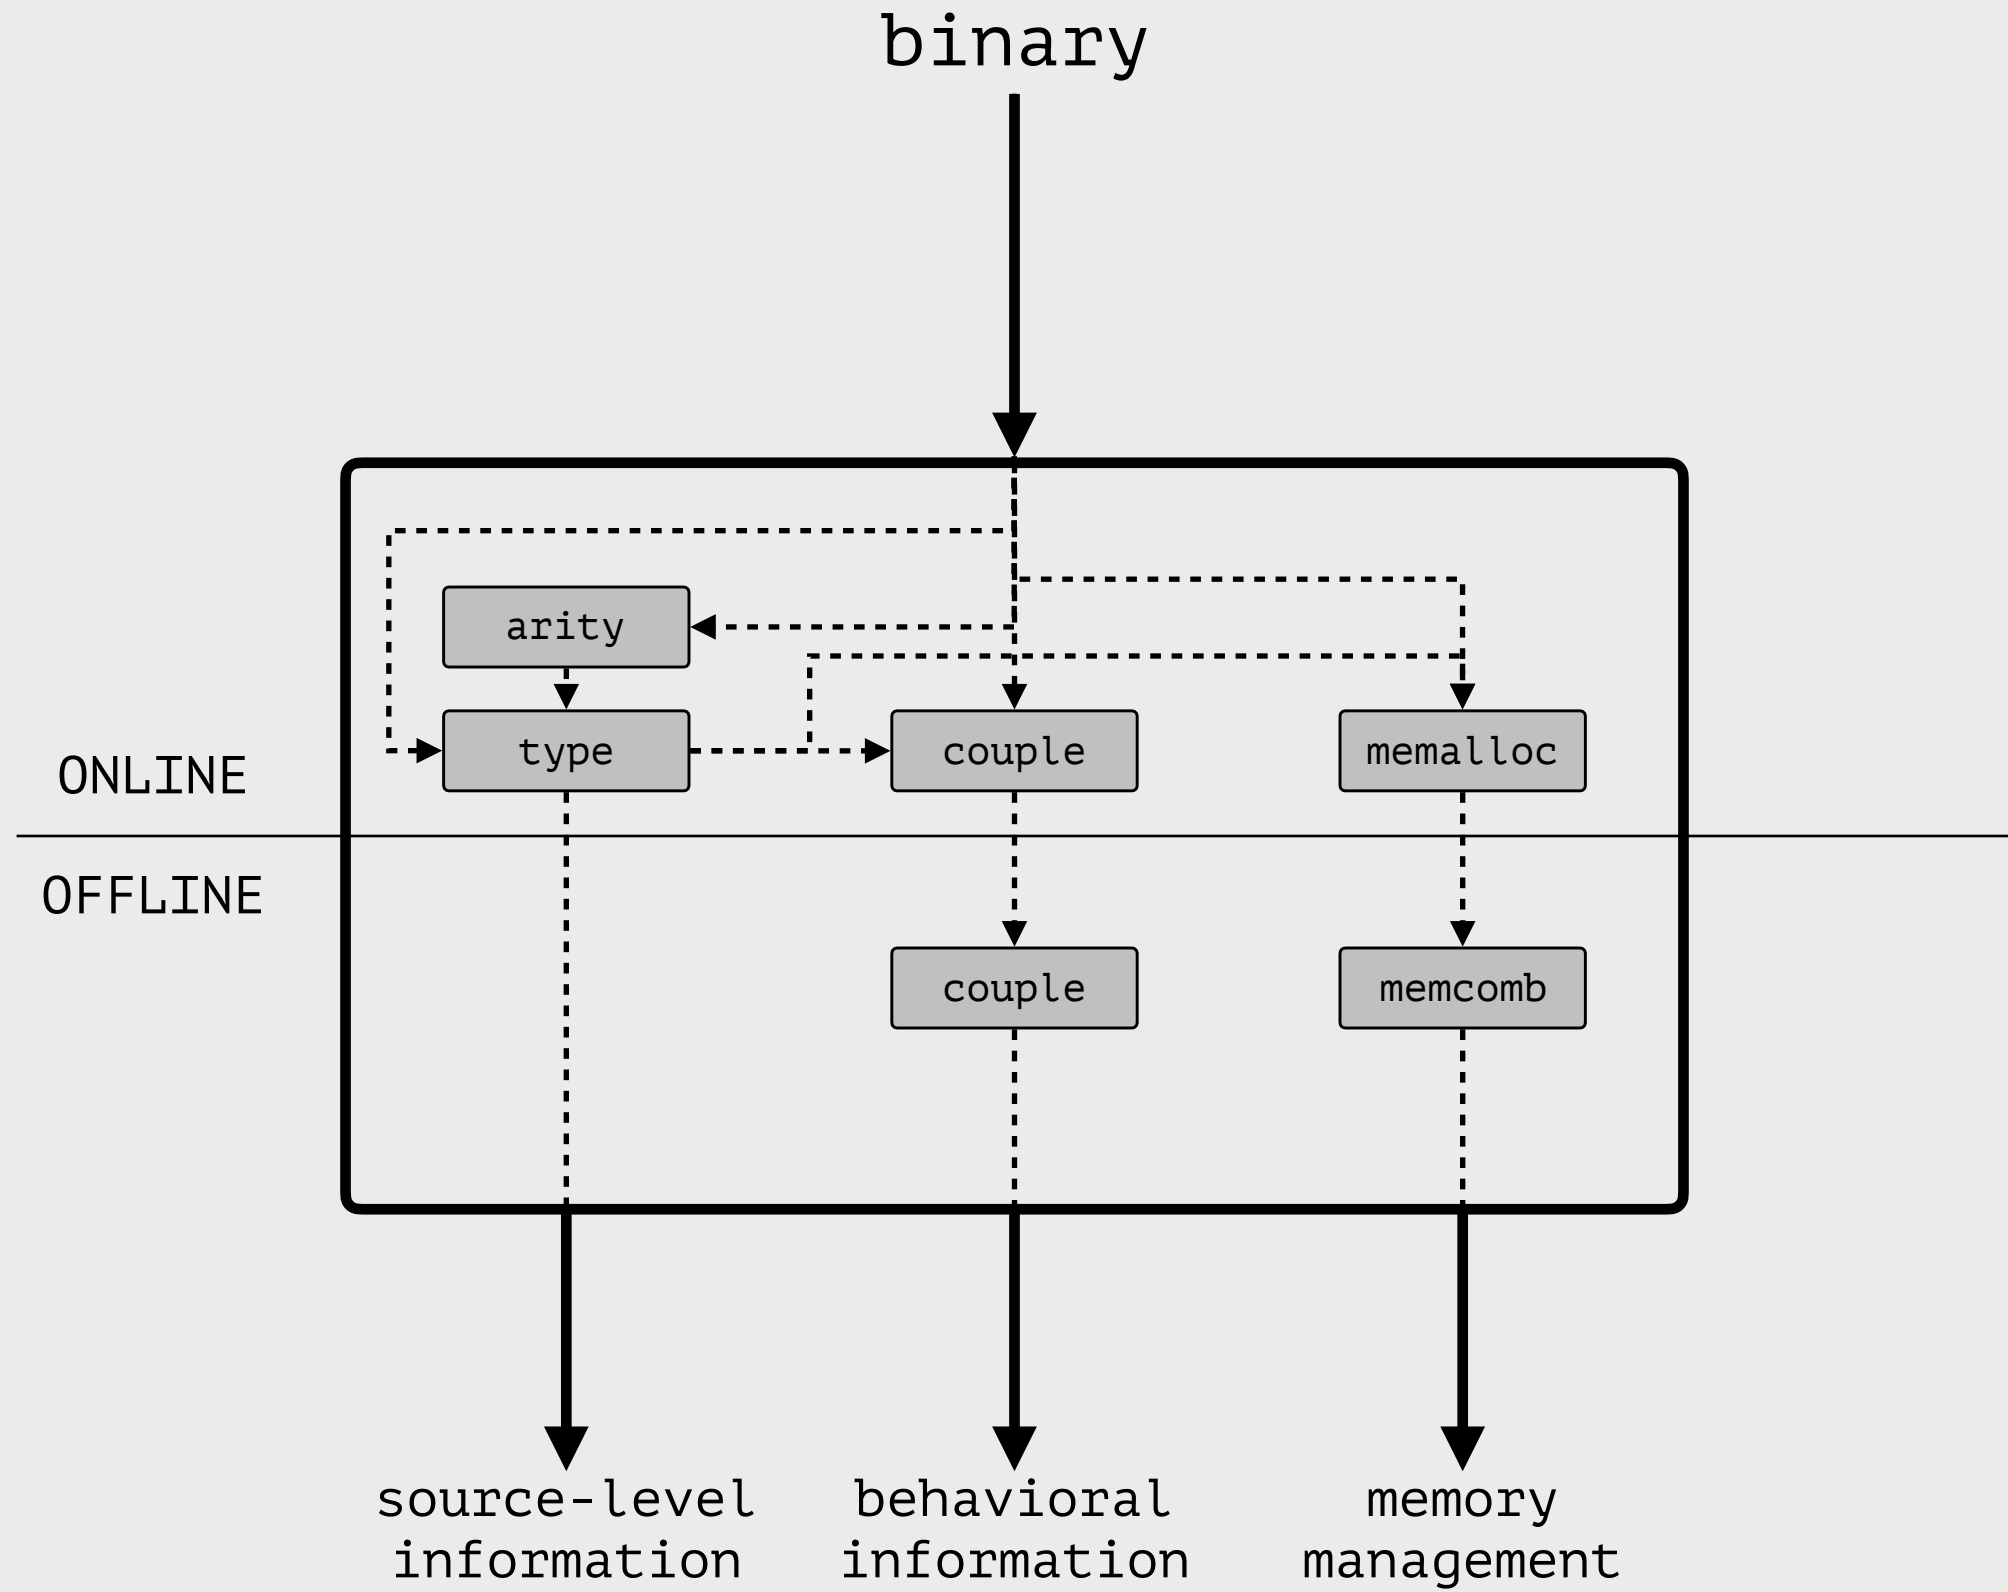

one single execution

(stripped) binaries

- binary program
- no source code
- possibly stripped
- can be obfuscated (dynamic!)

INSIDE `scat`

What if we analyze **`scat`** with **`scat`**? (Just kiddin')

INSIDE scat

parameters

addresses

data flow

(wip) ALLOC

INSIDE scat

parameters

addresses

data flow

(wip) ALLOC

Inference of address space

- load/store operands are addresses
- a value between two addresses is an address

```
401e5a: 55          push    %rbp
401e5b: 48 89 e5    mov     %rsp,%rbp
401e5e: 48 83 ec 30  sub     $0x30,%rsp
401e62: 48 89 7d d8  mov     %rdi,-0x28(%rbp)
401e66: 48 8b 45 d8  mov     -0x28(%rbp),%rax
401e6a: 48 8b 80 b0 27 00 00 mov     0x27b0(%rax),%rax -----▶ 0x7fe047407b00 is an address
...      :
...      :
```

INSIDE scat

parameters

addresses

data flow

(wip) ALLOC

Assumption

coincidence of **address** values => data flow

4006ed:	48 83 ec 28	sub	\$0x28,%rsp	
4006f1:	48 89 7d d8	mov	%rdi,-0x28(%rbp)	
...		
4008d9:	c9	leaveq		
4008da:	c3	retq	-----▶	returns 0x7fe047419010
...		
4009f6:	55	push	%rbp	
4009f7:	48 89 e5	mov	%rsp,%rbp	
4009fa:	48 83 ec 30	sub	\$0x30,%rsp	
4009fe:	48 89 7d d8	mov	%rdi,-0x28(%rbp)	-----▶ takes 0x7fe047419010
400a02:	48 89 75 d0	mov	%rsi,-0x30(%rbp)	

INSIDE scat

parameters

addresses

data flow

(wip) ALLOC

Main heuristic

ALLOC is the function that outputs the **greatest number** of new addresses.

EVALUATION

It's time to know if it really works...

EVALUATION

accuracy

limitations

scat > accuracy * arity

scat > accuracy * type

bash | grep | mupdf | git | tar | xterm | vim

EVALUATION

accuracy

limitations

- Only x86-64 binaries
- Calling-convention dependent
- No support of OOP
- Binary coverage

scat

« Tell me! Everyone is picking up on that feline beat / 'Cause everything
else is obsolete.

- Strictly high-buttoned shoes. »
